- English - fluent

Profile

Fullstack frontend developer with a passion for creating visually appealing user interfaces. I am detail-oriented and focus on clean and efficient code. I excel in translating design concepts into responsive web apps or mobile apps and creating user-friendly solutions as well as API integration. I am a humble person and a quick learner, who works well both independently and in cross-functional teams.

Experience

○ October 2023 - March 2024
